During the 2022 to 2023 transition, if you submitted a Professional Development Plan (previously Learning Plan) using the PDF template for 2022, an automatic message will be displayed as below. Please note that users who did not enter their learning goals at the start of 2022 will need to retrospectively add their goals for 2022 and then reflect on these.

#### CPD Professional Development Plan

The Professional Development Plan forms the basis for planning, structuring, and monitoring continuing medical and dental education activities. The RACDS CPD Program encourages participants to consider their learning needs, connect their learning needs to suitable education activities, obtain credit for the activities, and contemplate their progress and the activities in a way that may change current practice and guide future development.

#### Learning goals

Outline your annual learning goals relevant to scope of practice. Please note that at least one goal must be entered per year before your CPD Logbook will allow activities to be entered.

Time spent completing and reviewing your PDP can count towards the 50 hours of CPD required each year as a performance measurement activity and can be claimed under Category 3: Self Evaluation and Reflection.
